www.goldsgym.com

Introduction

It is an online website where people who are interested in joining this particular gym can easily get information. Like what the gym can provide to its members, some details on fitness programs, gears recommended by the gym to buy and the membership fee structures.

Objective

The key objective of this website is to let people join this gym, by showing pictures of the gym and giving information on the gym like how things work at the gym. Through that the user will have more knowledge about the gym so they can decide whether they need to join the gym or not, and all the necessary equipments related to assurance.

Description

Gold's gym website is to get access to more information on this gym and how the things work there. Modules are as follow:

- **Home:** It's the home page or the first page where the user can   access all the information roughly and give the user a clear idea about what kind of information they are searching for and give an overview about the whole gym.

- **Gallery:** As the topic stated, it's a gallery of gym and it gives users some visual data on the gym as it is easier to imagine and have some impact on the brain more than the words only. To access the gallery, the user will find the option in the home page or by clicking a random image showing in the home page, the website will direct the user to that particular image in the gallery.

- **Packages:** This module is to show the fee system or the package system to the user and some extra information related to the package. Package system will be mainly divided on the basis of time duration and under that, users will see discounts and benefits included with the membership package. But to access this, the user has to login into the gym first.

- **Login:** The login page is to let the user be part of the gym. In this page, the user has to give some personal data like name, gender, age, gmail address, phone number, country and the city where the user is living.

- **Careers:** users can access it through the home menu. In this page it gives information about the employee at the gold's gym. Like how the reward and recognition system works and the employee ranking pyramid and some videos of employees describing the work life there at the gym. At the end, the user will see an instruction of sending a copy of CV to an email address.

- **Gears:** It is an e-market of the gym where the user will be able to see the gym's kit. The main function is to form the home menu but in some gallery images features, a certain product will have hyperlink on it and by clicking on it, the user will be directed to that product in the gears module.

- **FAQs:** this module consists of some questions and answers on which most of the users get confused.
    1. Can I really build muscles if I join this gym?
    2. What will happen if I cancel the membership before the contract expires?
    3. After getting the membership can I go to the gym any time?

- **Contact us:** Contact number and email address would be written there for users to contact the gym if they face any problem or have any doubts.

- **Feedback:** An email address would be given there for any suggestion on the gym or the website.

- **Biography:** 1. goldsgym.in
              2. Oxygengym.com

Making of the Project

We have made this website by using Javascript, Html and CSS. Code is given below:

CSS Code for Styling the website:

```css
*{
    margin: 0;
    padding: 0;
    font-family: century gothic;
}

body{
    background-image: linear-gradient(rgba(0,0,0,0.5),rgba(0,0,0,0.5)),
url(img2.jpg);
    height: 100vh;
    background-size: cover;
    background-position: center;
    }

.mol{
    float:right;
    outline-offset: 10px;
    text-align: right;
    margin-top: 10px;
    margin-right: 10px;
}
.mol a
{
    text-decoration:none;
    color:white;
    padding: 5px 20px;
    transition: : 0.6s ease;
}
.logo ul{
    list-style-type: none;
```

```css
    float: right;
    margin-top: 25px;
}
.logo ul li{
    display: inline-block;
}
.logo ul li a
{
    text-decoration: none;
    color: #fff;
    padding: 5px 20px;
    border: 1px solid transparent;
    transition: 0.6s ease;
}
.logo ul li a:hover{
    background-color: yellow;
    color: #000;
}
.logo ul li.active a{
    background-color: yellow;
    color: #000;
}
.logo img{
    float: left;
    width: 100px;
    height: auto;
    margin-top: 15px;
}
.top img{
    float: left;
    width: 100%;
    height: 170px;
    margin-top: 35px;
    background-color: #000;
    background-size: 100%
```

```css
}

table,th,td{
    border:1px solid #000000;
    border-collapse:collapse;
}
td,th{
    padding;15px;
    text-align:right;
}
table#t01{
    float:left;
    margin-top: 50px;
    width:100%;
    background-color: black;
}
img#A{
    height: 500px;
    width: 300px;
}
img#A:hover
{
    transform: scale(1.2,1.2);
    transition: 1s transform;
}
.table a
{
    text-decoration: none;
    color: #fff;
    padding: 5px 20px;
    border: 1px solid transparent;
    transition: 0.6s ease;
}
table a:hover
{
```

```css
    background-color: #fff;
    color: #000;
}
.line
{
    height:10px;
    width:100%;
    background-color:yellow;
    float: left;
    margin-top: 100px;
}
.lop
{
    float: left;
    margin-top:10px;
}
.lop a
{
    text-decoration:none;
    color:white;
    padding: 5px 20px;
    transition: : 0.6s ease;
}
 .gallery
        .gallery .toy{
        margin:5px;
        font-size: 30px;
       }
       .gallery .hit{
        float: left;
        text-align: center;
        margin-top: 10px;
        width:100%;
        font-size: 100px;
       }
```

```css
.gallery .box{
 float: left;
 margin:10px;
 margin-left: 20px;
}
.gallery main img
{
  float:left;
  margin-left: `10px;
  height:200px;
  width:300px;

}
 .gallery main img:hover{
transform: scale(1.5,1.5);
transition: 1s transform;
}
.hit{
  float:left;
  margin-top:100px;
  margin:left:100px;
  width:1000px;
}
.q{
 float:left;
 margin-top:10px;
 margin-left:100px;
}
```

```
Output

Basics of the above code

Our website is covered by mostly CSS and HTML. CSS which stands for Cascading style sheet.

It is a language used for describing the presentation of a document written   in a markup language like HTML. CSS is a cornerstone technology of the world wide web, alongside HTML and Javascript. We've added background colour, margin, padding and images using CSS. HTML which is a hypertext markup language, used for creating web pages and web applications. We've used table tags in which we have mentioned rowspan and colspan. We have also used ordered and unordered lists for making the list of various objects of the gym.

Conclusion

The main motive of this website is to provide a platform to the user by which they can get all the necessary information about the gym and they can connect with us.
